Allowable Subject Matter

1. Claims 1-16 and 19-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to a subscriber line interface circuit (SLIC) that provides a communications interface between the digital switching network of a central office and an analog subscriber line. A subscriber line interface circuit apparatus includes pull-down circuitry to vary line currents of the tip and ring lines in response to a pull-down control signal. The pull-down circuitry operates in a first voltage domain. The apparatus includes control circuitry generating the pull-down control signal. The control circuitry operates in a second voltage domain substantially distinct from the first voltage domain. A control isolation stage is coupled to provide the pull-down control signals from the control circuitry to the pull-down circuitry. A feedback isolation stage provides feedback signals from the pull-down circuitry to the control circuitry. The feedback signals represent sensed pull-down currents associated with the tip and ring lines. The control circuitry provides the pull-down control signals for the tip and ring lines in response to the sensed pull-down currents.

Prior art of record failed to teach or fairly suggest the subscriber line interface circuit (SLIC) and method as suggested (see BPAI Decision dated 2/27/2008).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
